

PGI AND CVA

TIP SHEET

1) ASSESSMENT AND ANALYSIS

- Integrate PGI questions and concerns into existing CVA tools (assessments, targeting, monitoring forms).
- Ensure gender and diversity in NS staff and volunteers conducting assessments.
- During community engagements ensure that all community groups are represented including women, persons with disabilities, youth and men.
- Ensure needs assessments include gender and market analyses and collect and analyze data disaggregated by gender, age, and disability.
- Ensure PGI is factored in the risk assessment and analysis.

2) DESIGN

- Ensure PGI technical expert is part of the designing CVA response.
- Ensure that the different gender groups are actively engaged in the program design including registration, sensitization, frequency of the cash, delivery mechanisms to be used, and location of activities to ensure all can access.
- Consider essential factors for the safer transfer of cash to women, the elderly, pregnant, and lactating (amount, duration, frequency, and delivery mechanism)
- When considering conditionalities, ensure they are culturally appropriate for different groups e.g. cash for work.
- Ensure NS have in place community feedback mechanisms that are safe and inclusive

IMPLEMENTATION

3) IMPLEMENTATION

- Utilize the PGI analysis and gender and market analysis to identify the most vulnerable groups
- Ensure community selection committees are diverse including women, men, persons with disabilities, youth
- Ensure targeting criteria is clarified to all community members and validated by community members to enable smooth registration and verification.
- Ensure staff and volunteers from start to end of operation are diverse and have the right capacity (SADDD, PGI, CVA)
- Ensure validation of the recipients list is done in public and in a transparent manner
- Co-create with the targeted community's communication and engagement plans that promote gender equity and mitigate gender protection risks

4) MONITORING AND EVALUATION

- Ensure systems are in place to track SADDD
- Track to ensure PGI minimum standards are being met.
- Review the process of post-distribution monitoring paying attention to issues gender, age, and others
- Assess the impact of CVA on households
- In the learning, forums include PGI CVA-sensitive learning.
